

# Mobile Cryogenic Transfer Operation Platform

## Low Temperature Transport Trolley

### Scope of Application

The unit can be used to preserve plasma and biomaterials during transportation. It is suitable for deep hypothermia operation and transportation of samples in hospitals, various biobanks and laboratories. High quality stainless steel in combination with the thermal insulation layer ensures the effectiveness and durability of the low temperature transfer trolley.

### Ergonomic Design

- Corrosion Resistant
- Touch Screen
- High Polymer Materials
- Magnetic Insulation Cover
- Real Time Monitoring of Temperature and Liquid Level

## Product Advantages

**Touch Screen**  
LCD, touch operation.

**USB Data Export**  
It has its own USB interface and supports USB data export.

**Real Time Monitoring**  
The instrument monitors the temperature and liquid level in real time and displays the expected remaining service time. Continuous working hours up to 24 hours.

## User Friendly Design

**Exterior Coating**  
Exterior coating: corrosion resistant and easy to maintain

**Caster Design**  
Integrated design, universal caster at the bottom, easy to move.

**High Polymer Materials**  
The new type of environmentally-friendly polymer material is used inside the cover plate, which is more appealing, more environment-friendly and more advanced than the commonly used pearl foam and polyurethane materials.

**Magnetic Insulation Cover**  
The insulation cover magnetically attaches to the side of the trolley, which is convenient to extract, and the space reserved at the bottom can be used to store other tools and other materials.
